## KeyControl QuickStart Service

### Service overview

Entrust KeyControl Quickstart Service provides an Entrust Professional Services team member for the deployment and configuration of KeyControl for up to four KeyControl nodes in a single cluster. This service is delivered remotely in a single, contiguous session for up to eight hours. Additional Professional Services may be required for complex installations.

### Approach

Our approach is informed by years of experience installing, configuring, and deploying KeyControl. Our methodology is designed to accelerate the start of workload encryption and leave you with all the knowledge necessary to operate KeyControl. This includes:

- System architecture review
- KeyControl cluster installation
- Integration of supported nShield HSM, if applicable
- Review operational best practices such as backup, restore, high-availability, and disaster recovery scenarios
- Review support tools

### Engagement prerequisites

- Customer must read the KeyControl installation guide
- Customer will fill out technical prerequisite worksheet information provided by professional services
- Customer will download KeyControl and stage powered-off appliances for deployment into the virtual environment prior to engagement
- Customer will ensure all key personnel attend the KeyControl engagement

### Scope

This service is limited to the following:

- Up to eight contiguous hours of installation, configuration, and best practice transfer in either lab or production environment
- Services delivered remotely over phone or video call
