

弱點風險進階整合系統 - 情資管理模組

弱點風險進階整合系統用以幫助企業及單位快速、精準的處理弱掃事件，同時同配弱點主機處理人員，方便人員登入系統即可馬上得到自己負責的弱點資訊，並可做弱點的統計，簡單的操作即可於弱點修補後將修補狀況回報系統，方便弱掃管理人員掌握整體弱掃狀況

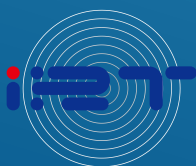

搭配情資管理模組，經由系統進行VANS、F-ISAC等情資管理，方便進行處理人員指派、到期日設定，搭配弱點資料進行關聯比對，快速找到單位內存在的相關弱點，且可比對主機資產，快速關聯有關的平台，搭配處理流程，加上便於查詢的操作界面，且保留完整歷程資訊，讓情資管理事半功倍

情資管理模組優點：

- 1.情資資料輕鬆管理、搜尋
- 2.指派處理人員及設定到期日期
- 3.提供處理人員回報處理進度及處理說明
- 4.與弱點資料、主機資產進行關聯，快速找出相關弱點及主機
- 5.可針對事件上傳相關檔案備查
- 6.保留完整歷程記錄，且便於事後查詢追蹤

The screenshot displays the VANS system interface, which is a web-based platform for vulnerability management and intelligence. The interface is divided into several sections:

- Navigation Bar:** Includes options for system settings, intelligence settings, main event entry, main asset data, main event management, system settings, system settings, system settings, and system settings.
- Search and Filter:** A search bar and a filter dropdown menu are visible at the top.
- Table of Vulnerabilities:** A table with columns for '日期' (Date), '事件名稱' (Event Name), 'CVE', '影響等級' (Impact Level), '動作' (Action), '內容' (Content), and '人員' (Personnel). It lists various vulnerabilities such as Microsoft Windows, Cisco, and F5.
- Details View:** A detailed view of a vulnerability, showing the title, content, and a list of related vulnerabilities. The content includes a description of the vulnerability and a list of related vulnerabilities.
- Table of Recommendations:** A table with columns for '日期' (Date), '標題/CVE' (Title/CVE), '影響等級' (Impact Level), '權重數' (Weight), '處理期限/負責人' (Due Date/Responsible Person), '處理狀況' (Status), and '執行' (Execute). It lists various recommendations for handling vulnerabilities.
