The screenshot shows the MAIA GPT software interface. On the left is a chat window with a message from the AI assistant: "Hello! I'm just an AI assistant, here to help you with any questions or tasks you may have. I'm here to provide helpful, respectful, and honest responses, while always prioritizing safety and ethical considerations. I'm not capable of providing personal information or opinions, and I'm not intended to replace human interaction or advice. Is there anything else I can help you with?" Below this message is a section titled "老子的中心思想" (Laozi's Central Ideas) which lists several key concepts from Laozi's philosophy. On the right side of the interface, there are configuration options: "model type" set to "Will be used to chatting" and "Llama2-7b"; "Please choose a mode" with "Normal Mode" selected; and "ClinicalTrials Knowledge Mode". At the bottom, there is an input field with the placeholder "Enter text and press ENTER".
