ITEM 7. MANAGEMENT'S DISCUSSION

Overview

We are a technology platform that uses a massive network, leading technology, operational excellence, and product expertise to power movement from point A to point B. We develop and operate proprietary technology applications supporting a variety of offerings on our platform. We connect consumers with providers of ride services and merchants as well as delivery service providers for meal preparation, grocery and other delivery services. Uber also connects consumers with public transportation networks.

Driver Classification Developments

The classification of Drivers is currently being challenged in courts, by legislators and by government agencies in the United States and abroad. We are involved in numerous legal proceedings globally, including putative class and collective class action lawsuits, demands for arbitration, charges and claims **before administrative agencies, and investigations** or audits by labor, social security, and tax authorities that claim that Drivers should be treated as our employees (or as workers or quasi-employees where those statuses exist), rather than as independent contractors.
