

零信任安全會議 大特色

6

全球唯一

E.164電話號碼歸戶

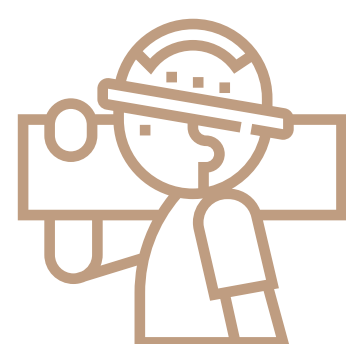

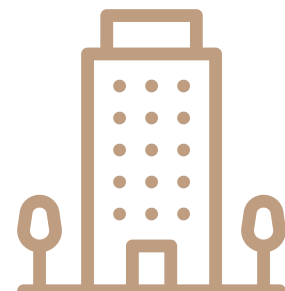

Based on patented E.164 Authenticated Routing, Authentication and Authorization, EAR ZT provides global secure Zero Trust connectivity.

無竊聽無入侵 最低時間延遲

By having a Layer 3 EAR ZT protected meeting device to serve you and your partners, the traffic of the meeting is always well encrypted and protected with the least time delay.

新世代零信任多媒體 總機方案

ZTMEET provides E.164 number based multi-media meetings as the next generation multi-media communications. You tell us how many "lines" of ZTMEET you need and we'll have the right solution ready for you.

機敏會議通信交換不過 任何第三方平台

No 3rd party platform can be trusted when you are making a highly confidential call or having a very valuable meeting. All you can trust is the meeting device under your physical control and protected by EAR ZT on the internet.

內建AOTP多因驗證 與FIDO2驗證

EAR ZT has integrate APP/AI AOTP for you. You do not need to pay any extra money for MFA because EAR ZT includes the latest MFA service with AI facial recognition ability already. FIDO2 is another choice that works with 3 Mode AOTP as mutual backup to each other.

零信任網管確保 自有會議設備安全

We has designed ZT applications for your business privacy and security needs especially in communication and file sharing. ZTMEET is the one that working well with EAR ZT and ZTDISK as basic foundations to support your business needs of ESG compliance and operation.

OmnuBud is the global patent and business holding company of EAR ZT service and solution. YeuNay Technologies Co., LTD. is the authorized agent in Taiwan. All the software and technology of EAR ZT is protected by local laws and the laws in the US. Any unauthorized duplication or usage of EAR ZT is prohibited and will be charged with corresponding penalties.
