Next Generation Intelligent Reasoning based NLU/NLP AI with AOAI/Copilot/ChatGPT

Integrating with LLMs, Intumit SmartGPT is a cutting-edge NLU/NLP-based AI that utilizes AOAI/Copilot/ChatGPT to allow our customers to leverage the latest NLP technology to automatically generate training data, detect intents, generate initial prompts, and build sample conversations with less efforts, as well as improving accuracy even with less training data.

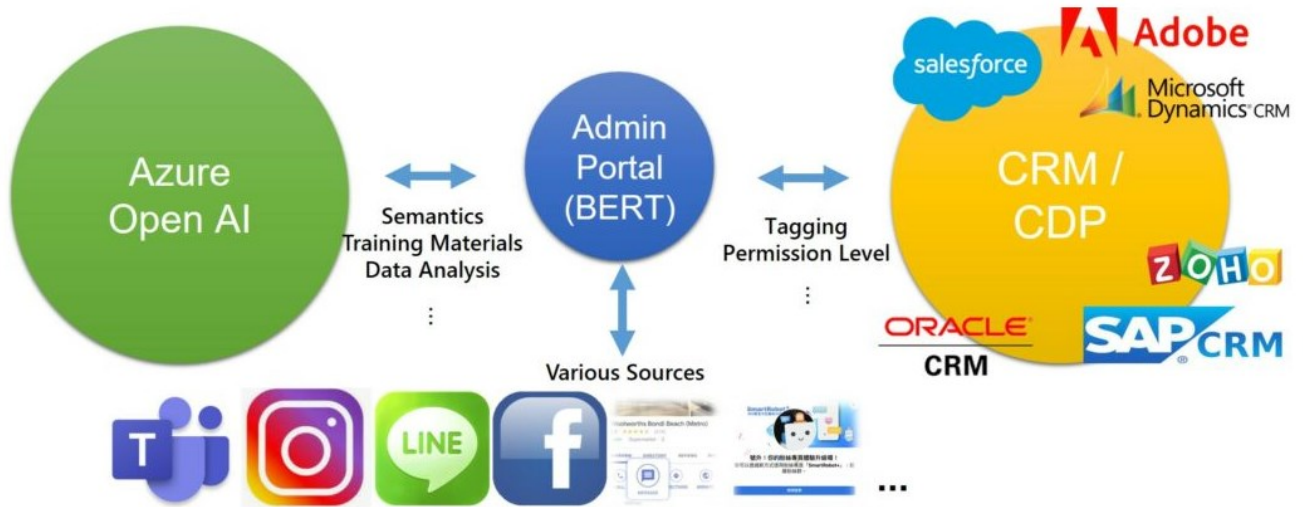

Intumit SmartGPT supports multiple languages and aims to provide quick and fast chatbot solution at a lower cost.

Intumit SmartGPT is a brilliant tool, more predictive than its predecessors, as Intumit keeps up to the latest technology for greater customer experience and employee experience.

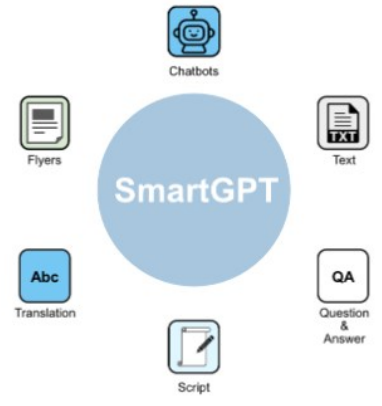

Intumit SmartGPT with AOAI/Copilot/ChatGPT

Intumit SmartGPT runs on our Conversational AI platform, SmartRobot, and provides a comprehensive solution for creating, training, testing, and deploying human-like digital assistants for customer interactions. These platforms offer chatbot building tools, APIs for integration with communication channels such as websites, messaging apps, and voice interaction, and options for connecting the chatbots to enterprise systems like ERP, CRM, SCM, and HRIS.

- Use **less training data** to quickly develop Chatbot
- Integrate traditional flyers, reports, registrations, and email notification into **one channel**
- Perform **wide range and complicated tasks** through conversational dialogues
- Handle **multiple languages**
- **Learn structures** like any others
- **Marketing and Promotional tools**
- Enhance development time, lower cost, and receive accurate answers
