Data Sunrise

Next Generation Data-Centric Security Software

WHY DATASUNRISE

- ✓ **Complete real-time protection: Data Audit, Database Firewall, Data Masking**

- ✓ **Centralized management of security policies**

- ✓ **Continuous database traffic monitoring**

- ✓ **SQL injection prevention**

- ✓ **Protection in the cloud and on premises across multiple data silos**

- ✓ **Heterogeneous database support**

- ✓ **Self-learning intelligence**

- ✓ **Integration with third-party SIEM and system management solutions**

DATA AUDIT

- ✓ Real-time tracking of all user actions and the changes made to the database

- ✓ Helps to reveal data breach, estimate its cost and quickly find its culprit

DATA SECURITY

- ✓ Analyzes database traffic

- ✓ Prevents execution of unauthorized queries and SQL injections in real time

- ✓ Reports on the detected threats are sent to IT Security staff

DATA MASKING

- ✓ Real-time dynamic data masking

- ✓ Obfuscates the output of sensitive data coming out of protected database

- ✓ A variety of masking algorithms to cover every possible scenario

SUPPORTED DATABASES

PostgreSQL · Amazon Aurora · ORACLE · AMAZON REDSHIFT · MySQL · Microsoft SQL Server

IBM DB2 · Greenplum · MariaDB · TERADATA · NETEZZA an IBM Company
